

# HI CONCEPT

## BY COLLECTION

Exceptionally versatile for all manner of applications, HI-MACS® is available in extraordinary array of colors or any other shade through its color-matching technology. Whether you're searching for bold, translucent, exotic texture, recycled material and beyond, our unique product lines have it all.

This year at NeoCon, HI-MACS® announced the new concept of 'Freedom of Imagination' through solid surface in order to reach new market heights and design potential by introducing new collections including White Gray & Black, Healthcare, Design Lab, Concrete and Breeze- and color concepts.

# Classic

Soft or loud, subtle or staggering. Himacs® Classic's shades and particulate patterns will let your space speak in exciting and original ways. From white limestone and warm beige to dark shades that sparkle like diamonds, our Classic series features a dignified collection of iconic textures and tones.

# Concrete & Breeze

Inspired by the urban, sublime and beauty found in buildings, Concrete breathes out an inexhaustible atmosphere of monochromatic beauty. Despite its raw appearance, soft colors and smooth surface pattern a touch of light while portrays the city reduced into a room - where life lifts from darkness and the warmth settles.

Like the traces of wind rolling in a wave of colors from the sky, Breeze is a warm, inviting cover to your home. The soft colors help to combine other finishing material such as wood, steel and concrete creating a delicate blend of styles. The soft marble pattern featuring tone-on-tone palettes adds subtle beauty with natural elegance in terms of design to the space.

## White Gray & Black

White, Gray & Black series - the new classic in solid surface, embraces ageless versatility and elegance. As black symbolizes power and elegance and white exudes purity and simplicity. The classic yet inspiring colors and translucent feature challenge designers to be truly bold and versatile, providing freedom but focus to design.

## Aster

Introducing HI-MACS® Aster, the next dimension in solid surface. Out of this world colors are fused with large transparent chips to emphasize today's new quartz styles while maintaining all of the potential of solid surface. Ethereal. Mesmerizing. Permanent.

This simple color palette of our Aster line features mother-of-pearl shimmer and glass-like transparent grain.

## Never Compromise | Classic

## Builder Collection

To meet the needs of residential builders, the most popular colors in residential market have been carefully chosen to create a collection of affordable yet inspirational assortment of builder colors

## Volcanics

"Active" best describes the patterns and tones found in our Volcanics line. Stunning arrays of variegated flecks are cast throughout handsome, compelling shades ranging from lighter pearl-like tones through deep, undulating grays. Large translucent chips in Himacs® Volcanics create dazzling color options, giving your surface breathtaking depth and clarity.

## Marmo

Himacs® Marmo, a contemporary collection that embodies the organic look of natural stone. A captivating combination of veined patterns and translucent chips, solid surface has never looked so natural, rich and exotic. The embedded fine particulates conjure the essence of select marble while softly accenting the luxurious, enchanting hues in which they lie amid.
